DEPARTMENT OF BUILDING INSPECTION

City & County of San Francisco
1660 Mission Street, San Francisco, California 94103-2414

May 2004 Cost Schedule

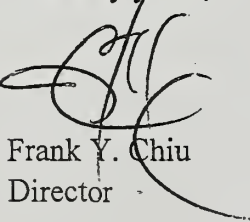

To All San Francisco Building Permit Applicants and Interested Parties:

Attached is the May 2004 Cost Schedule of Building Valuation Data for use in calculating a building's valuation for Building Permits in the City and County of San Francisco. This schedule is effective as of May 4, 2004. A valuation based on this table represents the valuation at the completion of all construction work authorized by a building permit. Permit fees are based on a percentage of this valuation. These valuations are not to be used as accurate guides to the actual cost of construction; for actual construction cost estimates for any project please consult a contractor, a design professional or a cost estimator.

This schedule will be updated by DBI's Technical Services Division on an annual basis or as otherwise directed by the Building Inspection Commission in accordance with the San Francisco Building Code Section 107.2. The valuation data is based on information provided by the Marshall Valuation Service.

For additional information on this schedule, please contact Chief Building Inspector Laurence Kornfield of the Technical Services Division at (415) 558-6244.

Sincerely yours,

A handwritten signature in black ink, appearing to read "Frank Y. Chiu".

COST SCHEDULE (BUILDING VALUATION DATA)

This schedule is to be used for determining permit and related fees posted in accordance with Section 107 of the San Francisco Building Code.

Building permit, building plan review fees and other related fees shall be based on the date of permit application or subsequent revision. Building floor area shall be calculated in accordance with the definitions contained in Chapter 2 of the San Francisco Building Code.

This schedule is updated each year, or as otherwise directed by the Building Inspection Commission, in accordance with the San Francisco Building Code Section 107.2.

GENERAL NOTES

- 1 Site Permits for all occupancies, except R-1 and R-3, are presumed to be without tenant improvements. The cost of tenant partitions shall be 9% (which does not include mechanical, electrical and plumbing work) of the base cost times the floor area of the tenant space and shall be calculated when the tenant improvement application or site permit addendum is submitted. Special costs (bank safe, mahogany paneling, marble finish, etc.) are to be added to the tenant improvement or site permit addendum costs.
- 2 For non-site permits, except R-1 and R-3 occupancies, add 9% for partitions and interior finishes.
- 3 The cost of mechanical and plumbing work shall be added to all tenant improvement applications on per square foot basis at \$22.92
or may be computed on an item-by-item basis as detailed in this Cost Schedule.
- 4 Deduct 15% from basic cost for mechanical floors of mechanical penthouses.
- 5 Hillside costs for buildings of all occupancies and types are to be added as follows:

Grade	0 to 5%	add	0% to cost
	5 to 10%	add	5% to cost
	10 to 20%	add	10% to cost
	over 20%	add	20% to cost

Add caisson cost by footage
- 6 Apply 3% discount for quantity construction of five or more buildings of similar design that are part of tract development.
